Managed Anti-Virus (AV) Service

Protecting your operation from potential attacks is a constant battle. With the ever growing risk of cyber-attacks and the constant evolution of viruses, it is important for any successful organisation to be prepared with the most up to date security and protection. A managed anti-virus service delivers that.

With our managed antivirus service, we centrally manage the solution to protect all of your endpoints from virus threats. Because updates are made centrally and automatically, your team do not need to update or scan their machines on their own.

Viruses and malware are immediately quarantined without user action being required, and everyone in your organisation has the most up-to-date virus definition versions at all times, along with associated network health checks.

By relying on us to keep your network protected from viruses, you reduce the risk of relying on people to run their own updates and therefore the risk of harm.

That leaves you and your team to focus on meeting your goals, confident in the knowledge that you are being protected.

With our managed anti-virus service, we

- Deploy anti-virus to all of your endpoints.
- Keep virus definitions up-to-date.
- Run constant scans.
- Detect, analyse, neutralise, and report all infections.

Protect yourself from the cost of downtime by relying on our proven managed anti-virus service.

Managed Anti-Virus (AV) **Benefits**

Focus on your core operations knowing that you are protected.

You and your team don't have the time, energy or knowledge to stay on top of virus threats. Just one weak link is all that it takes for you to be infected and for your operations to be hit. By relying on a managed service, you know that you are constantly being protected from harm.

Centrally managed anti-virus.

We are responsible for managing the anti-virus for large numbers of customers and endpoints. As such, we have dedicated subject matter experts who centrally manage all of our anti-virus services, ensuring that all endpoints are protected with the latest definitions.

Consistent and continuous protection.

You are always protected. Your team can not uninstall the anti-virus or turn it off. This consistency is a vital part of the value and protection of our managed anti-virus service.

Regular monitoring and updates, with rapid response.

You enjoy regular monitoring of all of your endpoints, with patches and updates made automatically without the need for your team to take action. System-wide updates happen automatically., and when threats are detected, the system and our team respond quickly to neutralise it.

Protect your environment with managed anti-virus.

Our experienced anti-virus experts will work hard to help you and your team stay safe.

Discuss your managed anti-virus needs by calling us on **+44 203 034 2244**, or emailing **hello@cardonet.co.uk**
