

Managed Cyber Awareness Training

Your people are one of your biggest vulnerabilities, so it is imperative that they are given regular, engaging cyber security training to identify threats and change behaviour.

Our cyber awareness training uses proven animated content as an effective way to capture your team's attention and improve training outcomes, reinforcing how to identify threats and keep your systems and data secure.

As cyberattacks become more frequent and destructive, it has become evident that most successful breaches involve social engineering tactics that deceive employees into sharing sensitive information or clicking on malicious links. As a result, cybersecurity training has become the most effective strategy for you to safeguard your data and systems against these threats.

Our managed cyber security training service delivers:

- ✦ Regular episodes sent once every 30 days.
- ✦ A micro-learning format, with episodes between 3 and 4 minutes in length.
- ✦ Focussed education based on current and prolific threats.
- ✦ Topical information, using real world examples demonstrating a significant breach.
- ✦ A single focussed topic to help ensure thorough understanding of the topic.
- ✦ Excellent animation and voiceovers from professional producers and actors.
- ✦ Follow up information to reinforce messages.
- ✦ A short summary and test at the end to ensure the topic has been understood.
- ✦ Thorough reporting of participation and results.

Managed Cyber Awareness Training Benefits

✔ You and your organisation have better protection against cyber security threats

Cyber awareness training can help your team identify and avoid potential threats such as phishing emails, social engineering tactics, and malicious websites. This knowledge can improve the overall security of your digital assets and potentially save you from the disruption and cost of a cyber breach.

✔ Reduced risk and increased security

A lack of cybersecurity knowledge among employees can increase the risk of a data breach or cyberattack. By providing cyber awareness training, you can reduce the likelihood of these incidents occurring, ultimately saving time and resources.

✔ Improved compliance

Many industries have specific cybersecurity regulations that must be followed to avoid legal or financial penalties. Cyber awareness training can help you ensure they are complying with these requirements.

✔ Lower cyber security insurance premiums

With the cost of cyber-breaches increasing all of the time, through ransom-ware payments and remediation, demonstrating to your cyber insurers that you provide cyber awareness training helps lower your risk and your subsequent premiums.

✔ Cost savings

The financial cost of a data breach or cyberattack can be significant, including costs associated with remediation, legal fees, and lost business. By reducing the risk of these incidents occurring, cyber awareness training can ultimately save you money.

Simplify the task of training your team about cyber security threats.

We can provide you with the tools your team needs to lower your risk of cyber-attack.

Discuss your managed cyber awareness training needs by calling us on +44 203 034 2244, or emailing hello@cardonet.co.uk
